

ATELIER FÉVRIER

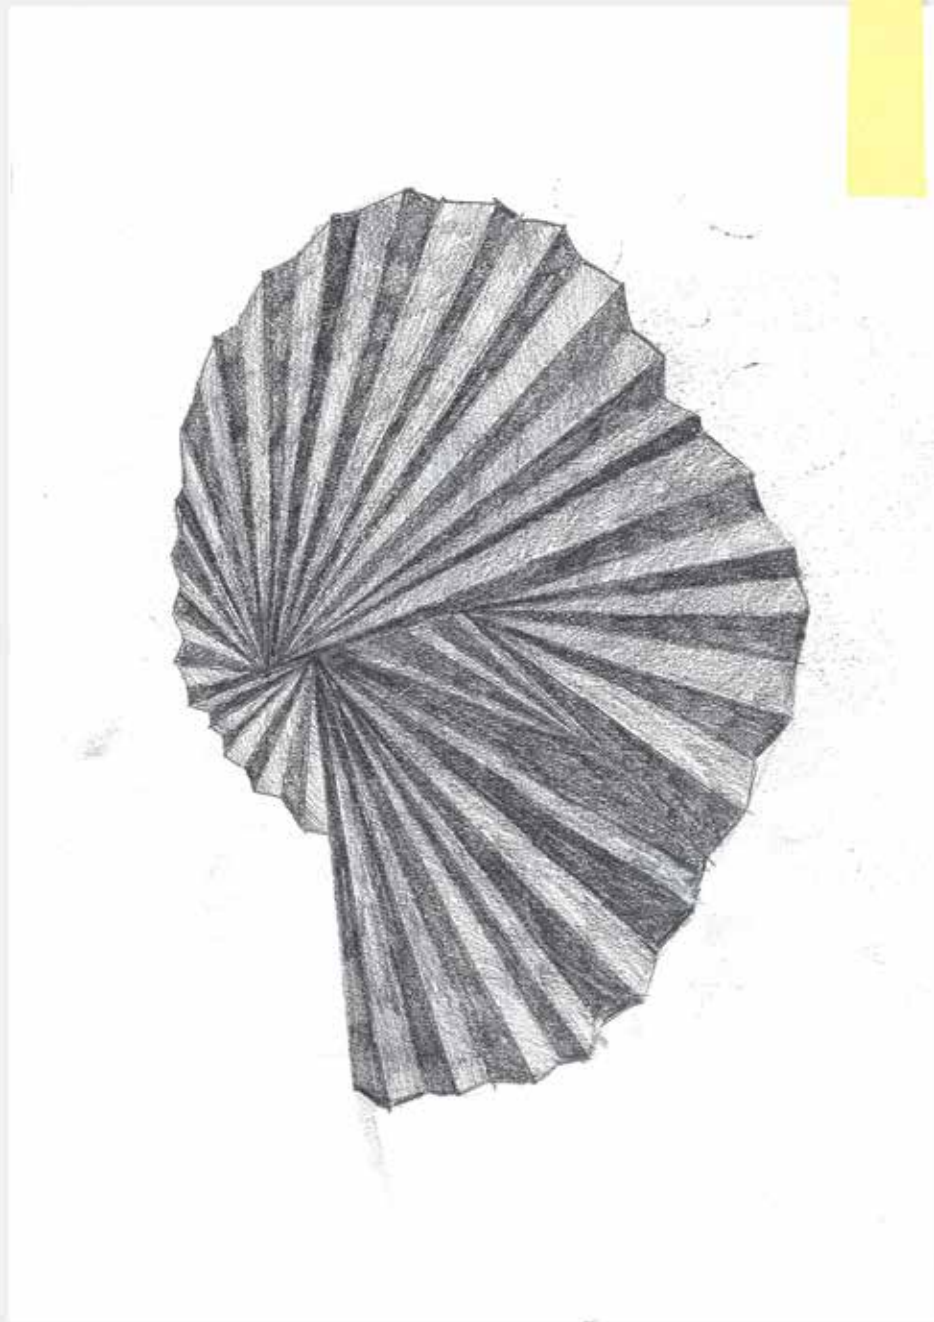

Atelier Février was founded in 2015 by Isha Mukhia Pretet and Florian Pretet. Since its creation, the Atelier has cultivated its distinctive identity through a delicate fusion of hand-drawn unique designs, meticulous material selection, traditional techniques and the option for complete customisation of every creation.

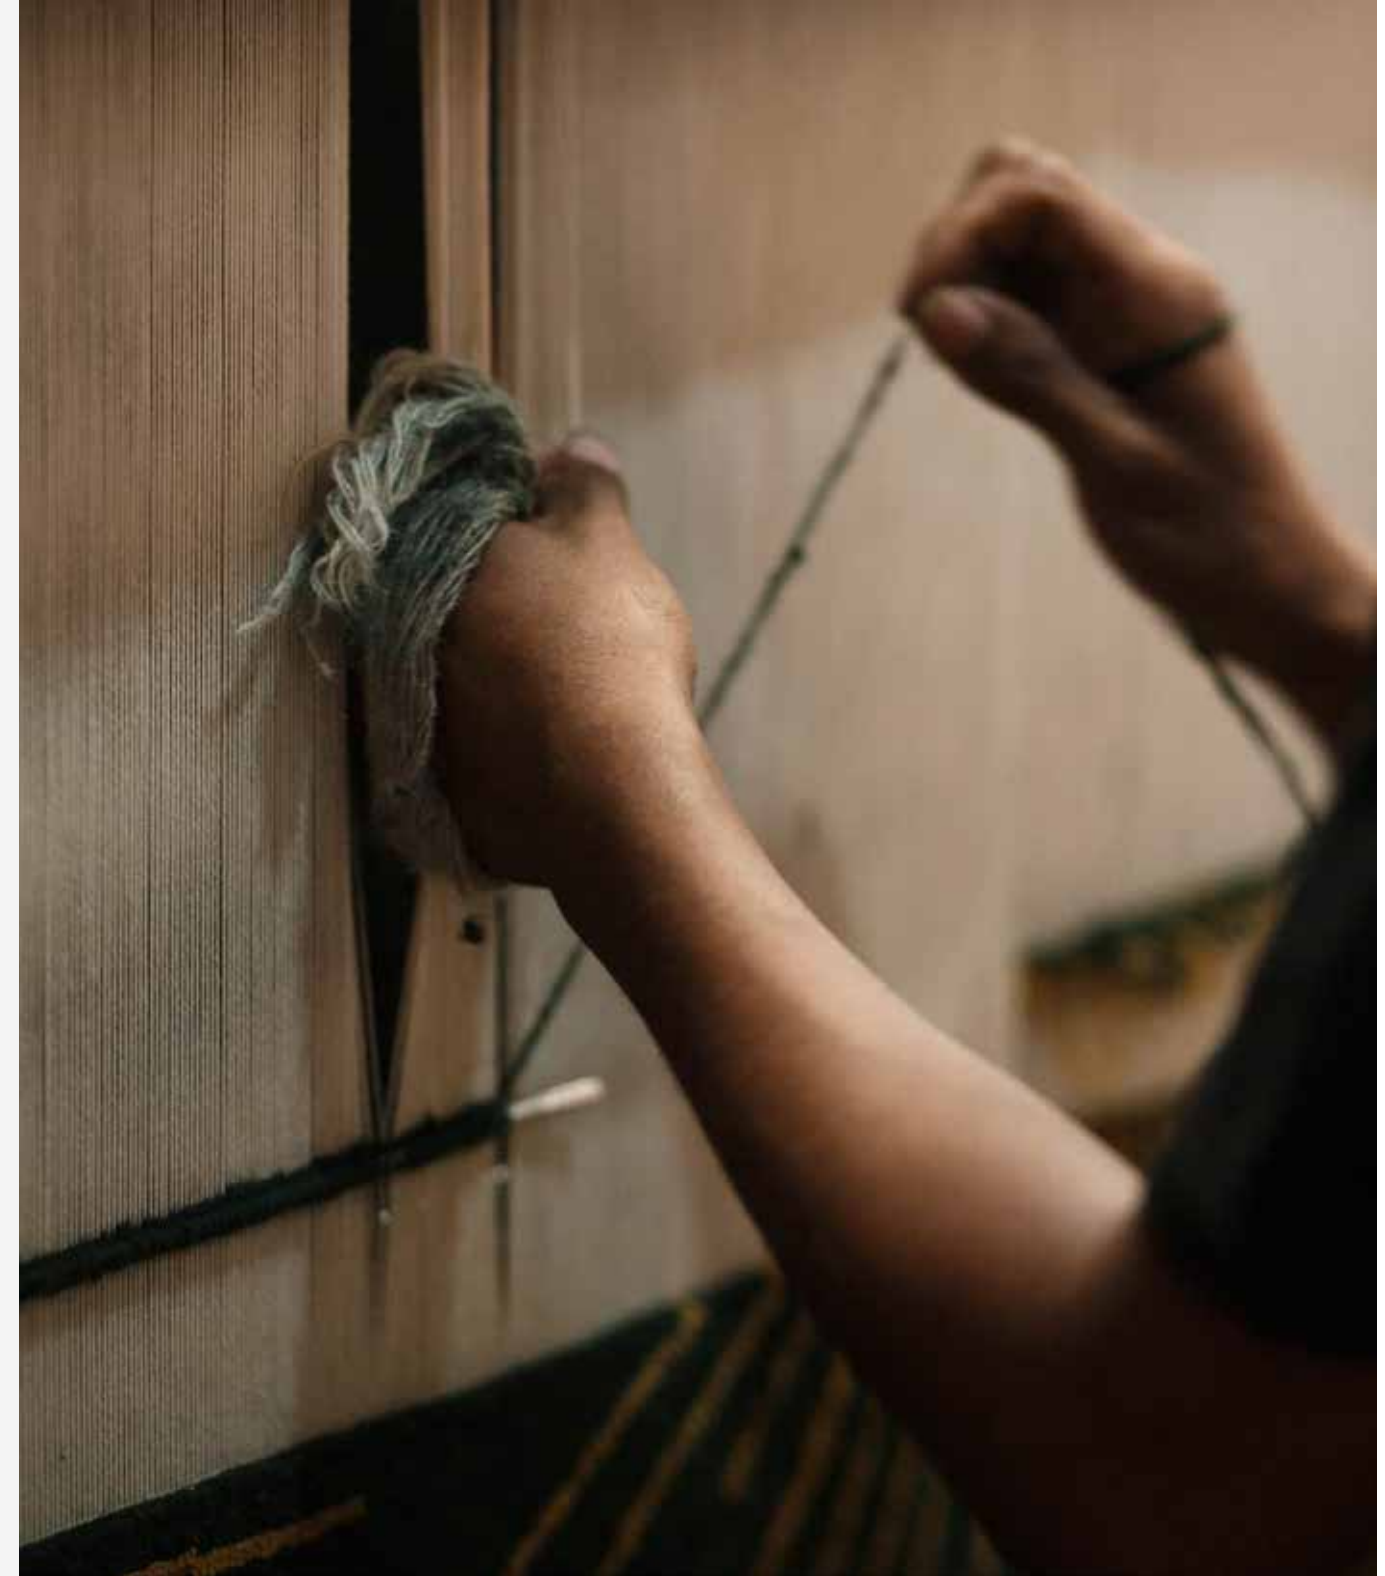

French designer Florian Pretet is at the head of creation of Atelier Fevrier. Each of his creations is first delicately drawn by hand and brought into life through patterns, sometimes hypnotising and richly detailed, sometimes refined and dreamy, always showcasing the beauty in the imperfection of a hand-drawn line.

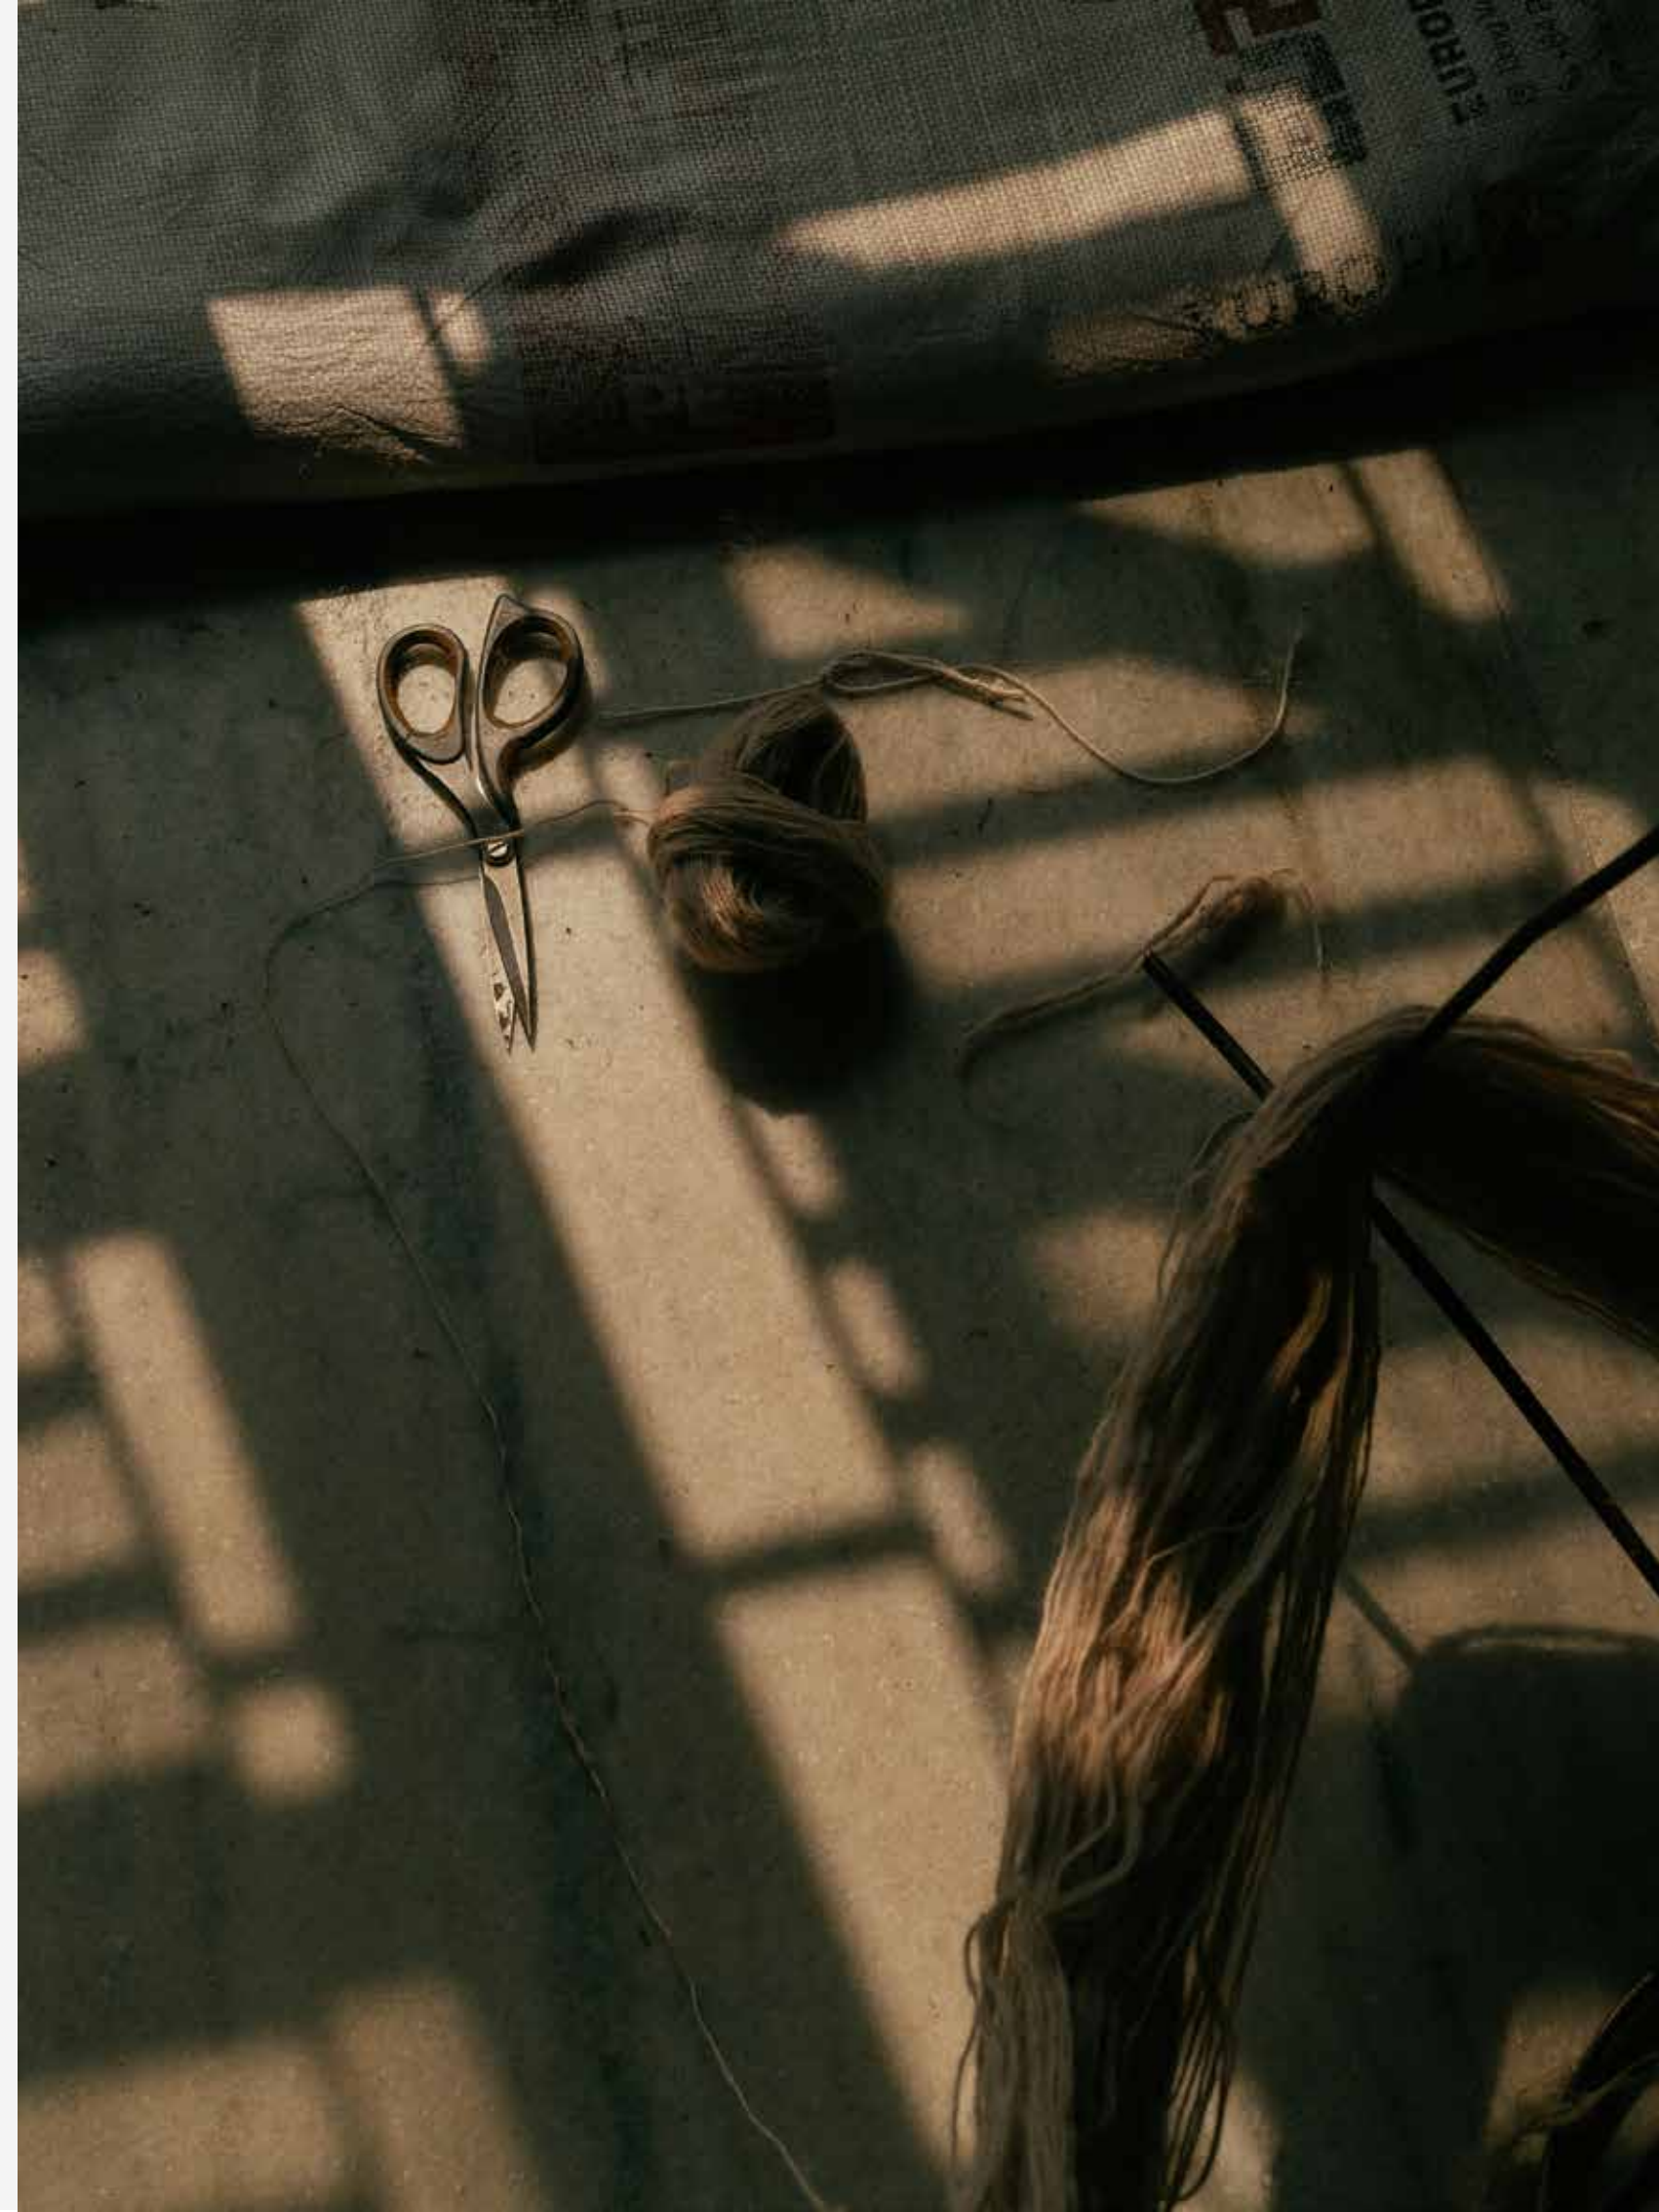

Once the final design is approved, Atelier Février's in-house designers work closely with the highly skilled artisans who will entirely hand-knot each creation by hand in Nepal, requiring hundreds and of hours of work. This time consuming and detailed process ensures the finest quality and allows for a complete customisation of Atelier Février's final pieces.

Atelier Février is committed to creating timeless, high-quality rugs with the least impact on our planet, resources and living beings. Producing rugs on command, with 100% natural fibers and dyes.

For the founders, the journey of design is a deeply personal one. It's a way to connect with others, to share our experiences, and to communicate our emotions in a meaningful way. It's about more than just creating beautiful objects—it's about creating a conversation, a connection, and a sense of community. We believe that design has the power to make a difference, to evoke powerful emotions and to spark meaningful change. And that's why we're so passionate about it. We're honoured to share our designs with you, and we hope that through our work, you'll be inspired to explore your own creativity and emotions in new ways.
